## 5 Use the network to plan an essay.

Imagine that you have to write an essay about one of these three 'faces' of Kurdistan. Choose one, and then choose three of the five topics that you have listed. Next, mention particular points that you would make. Start your plan like this and then continue.

I would like to write about the geography of Kurdistan. First, I would write a paragraph about its location, and I would say something about its neighbours - the rest of Iraq, Iran, Turkey and Syria.

Next, I would write a paragraph about \_\_\_\_\_, and I would say something about \_\_\_\_\_.

Then, I would write a paragraph about \_\_\_\_\_.

## 1 WRITING SKILLS Track 8

1-who can you see in the picture? what are they doing?

Azad and Stella. They are phoning each other.

2-what information do you need to complete the notes?  
Times and places.

3-why did stella have a problem? Because she had to go to an extra university lecture at 4 o'clock on wednesday afternoon.

A Listen and complete the notes.

Azad's first suggestion: Meet on wednesday afternoon at 3 o'clock.

Stella's problem: Extra university lecture at 4 o'clock.

Stella's suggestion instead: Meet on wednesday morning.

Azad's problem: Has to speak for Iraq at 11.30 a.m.

Stella's suggestion after that: Meet on Thursday afternoon at 3 o'clock.

Where they plan to go: Statue of Liberty and Empire State building.

B Turn the notes into Azad's email report to Kate Reilly. (He wrote it just after the conversation.)

First, I suggested meeting on wednesday afternoon at 3.00, but Stella had a problem with that because she has to go to an extra university lecture at 4 o'clock on wednesday afternoon. Then Kate suggested that we meet on wednesday morning instead. I had a problem because I had to speak for Iraq at 11.30 a.m., so after that Stella suggested that we meet at 3 o'clock on Thursday afternoon. I agreed with this time and we agreed to go to the Statue of Liberty and the Empire State Building.

By Dr Sally Dale

Dear Dr Sally,

I have just been accepted to study engineering at my first-choice college. Of course, I am very pleased about that, and I keep telling myself that this time next year I (1) \_\_\_\_\_ a great time. Dear Ann,

Yes, there is something: you (8) \_\_\_\_\_ consider taking a 'gap' year – a year away from education before you continue. Of course, you will (9) \_\_\_\_\_ to ask your college to hold your place for a year, but they will probably be very happy to agree. Then, (10) \_\_\_\_\_ that year, you can do a practical job and get experience in the real world of work. For example, you could join an organization that helps build things like bridges and schools in places such as Africa and S.E. Asia. If you do that, you (11) \_\_\_\_\_ valuable engineering experience as well as a break from studying. (12) \_\_\_\_\_ contact your college about this today?!

■ In Grade 9, you learned a little about Alexandria's Pharos lighthouse. Here is more. Use words from the tables to complete the text.

distance	e.g. metres (m) kilometres (km)	e.g. feet miles
area	e.g. square metres (m <sup>2</sup> )	e.g. square feet (sq ft)
volume	e.g. cubic metres (m <sup>3</sup> )	e.g. cubic feet (cu ft)

For 1,500 years, Pharos, the world's first lighthouse, stood on a small island at the entrance to the important Egyptian port of Alexandria. With its great (1) height of about 130 metres above sea level, it became one of the Seven Wonders of the Ancient World (along with the Pyramid of Khufu near Cairo).

Ships could see the light of Pharos from a (2) distance of 30 miles or more. By day, it came from a mirror that shone the light of the sun across the sea. By night, it came from a huge fire.

The base of Pharos covered most of the island and probably had an (3) area of roughly 10,000 m<sup>2</sup>. Rising from this, the main structure of the lighthouse consisted of three different parts. The first was (4) square in shape. It seems that each side was about 35m (5) long and was approximately 60m (6) high. On top of this, the second part had eight sides, and it probably had a (7) height of roughly 30m. The top part was (8) circular in shape and above that probably stood a statue of \*Poseidon.

Pharos guided ships to safety for many years, but earthquakes gradually destroyed it. Since 1994, over 2,000 ancient stones, columns and statues have been discovered on the seabed at a (9) depth of about seven metres, and it is believed that many of them were once part of Pharos. One huge column has a (10) length of nearly 29.7m.

There is also a line of over 20 huge blocks of stone, some over 11m (11) long, with a (12) volume of around 35m<sup>3</sup> and a (13) weight of as much as 75 tonnes.

\*Poseidon: the Greek god of water and the sea, also the bringer of earthquakes

## 2 Active and passive; by + agent

Put the following into the passive. Use *by* + agent only when it is important to do so.

### Alexandria and Pharos

Alexander the Great founded Alexandria over 2,300 years ago, and his people built this great new port on the coast near the mouth of the River Nile. Under the new king, Ptolemy I, they designed many fine buildings for this new capital of Egypt. Then they began the construction of the most famous of them all – the Pharos lighthouse. Ptolemy I's son, Ptolemy II, finished the project 12 years later. From that time, its light guided visitors safely into the port, day and night. Although earthquakes destroyed it long ago, and no one has seen it for 700 years, people still remember it as one of the Seven Wonders of the Ancient World.

*Alexandria and pharos*

## 1 expressing certainty and possibility – past and present

Use the verb in brackets and suitable forms from the table to complete the following.

	certain	possible
present	* <i>must/can't be (doing)</i>	<i>may/might/could be (doing)</i>
past	<i>must have (done)</i> <i>can't/couldn't have (done)</i>	<i>may/might/could have (done)</i>

\*Before you start, read about *must* and *can't* for certainty in Language Focus Lesson 2 on SB page 26.

### Pharos, past and present

No one knows for sure the height of Pharos, but it (1) must have been (be: certain) about 130 metres. And as one of the tallest structures in the world at that time, it (2) must have been (amaze: certain) everyone who saw it. Sadly, a long series of earthquakes between 320 and 1303 gradually destroyed it. It seems that an earthquake in 796 (3) might have damaged (damage: possible) the top part quite badly. However, it (4) can't have collapsed (not collapse: certain) because the famous writer Idrisi tells us that it was still working when he visited in 1115. However, there (5) could have been (be: possible) some major problems because Salah al-Din, the great Kurdish leader of the Muslim World and ruler of Egypt, began repair work in 1272. Sadly, soon afterwards, a huge earthquake in 1303 sent almost the whole structure to the bottom of the sea.

Since 1994, around 2,250 large pieces of stone have been found on the seabed, and many of these (6) must be (be: certain) the remains of Pharos. The experts say that there (7) must also be (also be: possible) about 500 more blocks, statues and columns down there which still have to be found. The hope is that with much careful study, all these pieces will tell us more clearly what the whole structure (8) may have looked (look: certain) like when the Ptolemies were the rulers of Egypt.

## UNIT TASK

In Lesson 3 you spoke about old buildings or ancient sites that need to be investigated and/or protected. There are thousands of places like these in Iraqi Kurdistan. Most have not been investigated, and many are believed to be very ancient.

Write a short, formal presentation to UNESCO about one of them. Do the following:

- Complete the statement about the report.
- Introduce the place this report is about and where it is. Explain why it is special.
- Give a description of the place as it now appears.
- Say what may be discovered if it is investigated and what may happen if it is not protected.

Start like this:

Report on \_\_\_\_\_ and the need to \_\_\_\_\_

The aim of this short report is to present a description of \_\_\_\_\_  
to explain why it is special, to describe the place as it now is, and to show the need for its urgent investigation and protection.

This place is standing at the centre of Erbil city in Kurdistan. It is one of the most important places in the middle East. It is said that human beings have lived here continuously for up to 8000 years - longer than anywhere else in the world.

As it now appears, the citadel contains approximately 500 houses and other buildings and many of these are wonderful examples of traditional architecture and construction techniques.

Here in Kurdistan, we believe that there has sadly been a lot of damage and almost it urgently needs to be investigated and protected. If it isn't protected, important secrets about our ancient human past - secrets may be lost easily.

# Language Focus

## 1 GRAMMAR AND FUNCTIONS

A Complete the following paragraphs from a newspaper report. Put the verbs in brackets into suitable forms of the passive.

### ANCIENT JEWELLERY FOUND ON SEABED

During the last three months, hundreds of ancient pieces of gold and silver jewellery (1) have been found (find) on the seabed just a kilometre from the south-east coast of England. Nothing remains of the boat that was carrying them, but (2) it is thought (it / think) that it was on its way to what is now Germany.

The search is continuing, and it (3) is being carried out (carry out) by a group of friends who are professional divers, not archaeologists. However, their finds (4) are being sent (send) straight to a team of archaeologists in London, and they are creating great interest there. The London team's leader, Dr Alan Rose says, 'These objects are nearly 2,500 years old, and they (5) were made (make) by people who were real artists in metal. And another very important thing: before this, (6) it's thought (it / think) that sea trade did not develop until much later. These finds mean that the history of sea trade in northern Europe must now (7) be written (write) again.'

A full report (8) will be published (publish) as soon as possible. A TV documentary (9) is also being made (also make) during the next month. (10) it is hoped (it / hope) that this will be ready to broadcast before the end of the year.

B Complete the following paragraphs with modal verbs to express certainty and possibility.

No one knows for sure, but the ancient boat that was carrying the jewellery (1) may / might / could have been (be: possible) up to ten metres long. And archaeologists now believe that boats like this (2) might have sailed (sail: possible) regularly and quite safely across the open sea.

So what happened to this boat? Dr Rose feels that there (3) must have been (be: certain) a very sudden storm and, as a result, the boat (4) can't have had (not have: certain) time to escape to safety before it was destroyed by the wind and waves.

And did the sailors and merchants on the boat escape? Dr Rose thinks that one or two of them (5) could have swum (swim: possible) to the coast but, sadly, he believes that in a storm as bad as this most (6) couldn't have survived (not survive: certain).

*can't* *couldn't have survived*

### 3 TO HELP YOU STUDY

Some languages are spelt phonetically: they are spelt the way they sound. However, English spelling is more complicated, and this means it is very important to use your dictionary and the phonetic alphabet.

There are basic pronunciation and spelling rules, but sounds are often spelt in other ways, too. For example, you have studied the sounds of *s* in Unit 3 – /s/ and /z/ as in *studios* – but there are also words with different pronunciations of *s* or *ss*, e.g. *sure* /ʃʊə(r)/ and *unusual* /ʌn'ju:ʒuəl/.

**A** Copy the phonetic spellings of these words from the Grade 12 Alphabetical Wordlist.

Then practise pronouncing them.

commission /kə'mɪʃ(ə)n/      dimension /daɪ'menʃ(ə)n/  
measurement /'meʒə(r)mənt/      treasure /'treʒə(r)/

You know the usual pronunciations of *c* – /s/ and /k/ as in *circular* – but there are also words with different pronunciations of *c*, e.g. *ancient* /'eɪnʃ(ə)nt/ and *precious* /'preʃəs/.

**B** Copy the phonetic spellings of these words from the Grade 12 Alphabetical Wordlist.

Then practise pronouncing them.

delicious /dɪ'lɪʃəs/      efficient /ɪ'fɪʃ(ə)nt/      specialize /'speʃəlaɪz/

You know the usual pronunciation of *ch* – /tʃ/ as in *merchant* – but there are also words with different pronunciations of *ch*, e.g. *machine* /mə'ʃɪn/ and *school* /sku:l/.

**C** Copy the phonetic spellings of these words from the Grade 12 Alphabetical Wordlist.

Then practise pronouncing them.

archaeologist /ɑ:'rkiɒlədʒɪst/      architecture /'ɑ:ɪtʃɪtektʃə(r)/      technique /teknɪ:k/

5 ~~GRAMMAR~~ conjunction + present + futureA Choose from the conjunctions in brackets to complete the text.

The price of fuel touches everything we do on a farm like this – the use of heavy equipment, the price of farm chemicals, transport and heat for the animals in winter. Now, that price has already gone up by a fifth in the last year, and (1) \_\_\_\_\_ (if / as) it goes up by another 20%, we just won't be able to continue farming.

Even (2) \_\_\_\_\_ (as / before) it rises by as much as that, we will be in a lot of trouble. Our prices will have to jump 20% or more, and (3) \_\_\_\_\_ (when / before) that happens, the big supermarkets will quickly stop buying from us and start trying to buy more cheaply from abroad. And (4) \_\_\_\_\_ (as / after) they change like that, they won't come back to us in the future – even if fuel prices, and therefore our prices, drop again.

And what will happen (5) \_\_\_\_\_ (after / before) more and more farmers like me disappear? Well, gradually less and less food will be produced, and (6) \_\_\_\_\_ (as / before) less and less is produced, prices will slowly go up and up – here and everywhere else, too. And (7) \_\_\_\_\_ (before / when) that world food crisis arrives, perhaps people will remember how farmers like me tried to warn the world!

After my last exam, I will (tell my parents that I never want to take another exam in my life!)
- 4 How will you celebrate **when** you finally leave school at the end of the year?  
When I finally leave school at the end of the year, I will (have a small party to celebrate.)

## 2 ~~as long as~~ long

You have used conditional statements like this for many years:

*If this land is not farmed sustainably, it will turn into desert.*

In Grade 11, you learned other ways of expressing the same idea, including:

*Unless this land is farmed sustainably, it will turn into desert.*

These forms are negative, and they warn about a bad result: ... it will turn into desert.

Now you have another form that focuses on a positive result:

*As long as this land is farmed sustainably, it will not turn into desert.*

Turn the sentences into pairs of conditional statements. Start with the words in brackets.

1 To grow well, these plants need to get lots of sun. (as long as) (unless)

a As long as these plants get lots of sun, they will grow well.

b Unless these plants get lots of sun, they will not grow well.

2 We need to have good weather, or the trees will not produce good fruit.  
(as long as) (if ... not)

■ ~~As long as we have good weather, the trees will produce good fruit.~~

b ~~If we don't have " " " " " not " " " "~~

3 To do well, you need to give these flowers more water. (if ... not) (as long as)

a ~~If you don't give these flowers more water, they will not do well.~~

b ~~As long as you " " " " " will do well.~~

- a ~~Unless you protect your vegetables, they will be attacked by disease.~~

## WRITING

A Use information from the pie chart and the table to complete a paragraph about the continent with the highest freshwater runoff.

Freshwater runoff into the oceans  
per year (in cubic kilometres)

Some major rivers, by continent

Africa	Asia	Australia	Europe	North America	South America
Nile	Tigris	Darling	Rhine	St Lawrence	Orinoco
Zambesi	Euphrates	Murray	Loire	Ohio	Amazon
Congo	Indus		Danube	Mississippi	Tocantins
Niger	Ganges			Rio Grande	São Francisco
	Brahmaputra			Colorado	Paraná
	Mekong				Negro
	Yangtze				
	Amur				

Asia is the (1) continent with the highest freshwater runoff into the (2) oceans. This is due to its many large rivers, which include the Tigris, the (3) Euphrates, the (4) Indus and the (5) Ganges. Together, Asia's rivers produce more than a (6) third of global (7) runoff – a total of (8) 13,190 cubic kilometres every (9) year. This is roughly the same amount as the total runoff from North America, (10) Africa and (11) Europe.

B Now write a 'mirror' paragraph. Use information from the pie chart and the table to complete a similar paragraph about the continent with the *second-highest* freshwater runoff.

\_\_\_\_\_ is the continent with the second-highest \_\_\_\_\_

**Sirwan** No, we would try to avoid that. We've thought of several things we could do instead.

**Shilan** (12) \_\_\_\_\_ (For example, / Therefore,) we might go back to our families in Kurdistan and try farming there.

**Reporter** Well, I'm sure that would be great for you in a lot of ways, but we hope everything goes well for you here.

## 3 TO HELP YOU STUDY

You are writing about *The Future*. You want to use a chart to help explain ■ point.

Complete the bar chart using figures from this paragraph. (Before you start, study the bar chart in the SB Reference Section page 111.)

Developed economies such as those of the USA, Japan and Europe produce more carbon emissions than other parts of the world. They will therefore have to reduce their carbon emissions more. In a country like Britain, every man, woman and child produced an average of 5.2 tonnes of carbon emissions in 2010. This came from things like driving cars and using energy in the home, and the government's plan is to reduce this level greatly by the year 2050. The aim is to cut emissions to 3.8 tonnes per person by the year 2020. This is already a huge cut, but it is only the start. By 2030, there needs to be a further fall of over half to reach an average of 1.5 tonnes. By this time, it will be getting hard to find further cuts, and so the 2040 level has been set at 1.3 tonnes. Finally, the plan is to reach 1.1 tonnes of emissions per person by the year 2050. This will be just over a fifth of the level of carbon emissions half a century earlier!

**1 VOCABULARY: office equipment**

Some young UK school students are visiting a local company, InterTech, to learn about the world of work. The manager, Dr Dyson, is showing them round.

Complete the conversation with these words.

calculator	computer	document	fax machine	headset	keyboard	laptop
mobile	mouse	photocopier	printer	screen	type	web cam

*students* S1 What pieces of office equipment do you use most?

*Dr Dyson* Dr D Well, here in the office, I use an ordinary landline phone and my desk-top (1) computer.

But then, when I have to go out and travel from place to place during the day, I take my (2) \_\_\_\_\_ phone and I also take my (3) \_\_\_\_\_ computer, which I can use in my car, for example. Oh, and as I deal with numbers a lot in my work, I always carry a (4) \_\_\_\_\_ with me, too.

S2 What is that person over there wearing on her head?

Dr D That's a (5) \_\_\_\_\_. She's wearing it to leave her hands free, so then she can (6) \_\_\_\_\_ people's details on her computer as she speaks to them.

S3 How does she do that?

Dr D Well, she types the details on the (7) \_\_\_\_\_, and the (8) \_\_\_\_\_ in front of her shows what she has typed. And she holds that (9) \_\_\_\_\_ with her right hand to move up and down and around the screen – for example when she wants to change something she has typed.

S4 I've heard of something called Skype. What's that exactly?

Dr D That allows you to use your laptop as a phone, and it allows you to see the person, too. You see, there's a little camera called a (10) \_\_\_\_\_ at the top of the screen, so when you talk to someone, your two computers also send each other pictures that you see on your screens.

S5 How do you make paper copies of a computer (11) \_\_\_\_\_?

Dr D You send it electronically from your computer to your (12) \_\_\_\_\_, and that produces as many copies as you want.

S6 But what happens if you only have a paper copy of a document?

Dr D Then you use the office (13) \_\_\_\_\_ to make copies. It's very fast.

S7 How do you send a document from one office to another? By post?

Dr D No, not usually. That's far too slow! We normally email something like that from one computer to another. And if we only have a paper copy, then we can use our (14) \_\_\_\_\_ instead. It turns a letter or a picture, for example, into electronic signals and sends them straight down the phone line.

## 1 VOCABULARY: literary criticism

Complete the short essay on the poem *New Frontiers*. Add words from the boxes.

4	1	8	6
lines	poem	rhyme	rhymes
5	2	3	2
scheme	verse	verses	writer

In this short (1) \_\_\_\_\_, the (2) \_\_\_\_\_, Coral Rumble, talks about the amazing fact that modern technology allows her to explore the whole world without leaving her office.

The poem has just four (3) \_\_\_\_\_, each with four (4) \_\_\_\_\_. The rhyme (5) \_\_\_\_\_ is a simple one in verses one, two and four: every second line (6) \_\_\_\_\_ – *need, speed*, etc. (7) \_\_\_\_\_ three is slightly different though, as all four lines (8) \_\_\_\_\_, with the pattern a, b, a, b.

<del>15</del>	<del>14</del>	<del>9</del>	
meaning	point	rhythm	
stress	strong	structure	title
<del>10</del>	<del>11</del>	<del>12</del>	<del>13</del>

Like the rhymes, the (9) \_\_\_\_\_ of the poem is very simple. It is basically a weak (10) \_\_\_\_\_ followed by a (11) \_\_\_\_\_ stress, repeated again and again.

With the fun of the last line and its simple four verse, four line (12) \_\_\_\_\_, this short poem seems very light. If, though, we look at the poem's (13) \_\_\_\_\_, *New Frontiers*, we can see that the writer is making quite a serious (14) \_\_\_\_\_. At first, this title might just seem to mean the lines between countries that she crosses on her 'journeys' round the world. However, it has a different, deeper (15) \_\_\_\_\_: it actually expresses the idea that the writer can now explore the farthest edges of what we know and of what is scientifically possible.

## B Exam practice: Write a paragraph.

Give full answers to write a paragraph about the situation after the captain's death.

Who<sup>1</sup> did Jim tell about Pew's visit and the captain's sudden death as soon as she came? What<sup>2</sup> was it hard for them to decide then? On the one hand, who<sup>3</sup> did Jim want to go and see? And what<sup>4</sup> did he want to tell him about? On the other hand, why<sup>5</sup> didn't he want to do that? Why<sup>6</sup> were they also against staying together at The Admiral Benbow? What<sup>7</sup> did they therefore decide to do next? Then what<sup>8</sup> did they plan to do after that? Why<sup>9</sup> did they want to do that?

As soon as Jim's mother came, he told her about Pew and the captain's sudden death. It was hard for them to decide what to do then. On the one hand, Jim wanted to go and see Dr. Livesey. And he wanted to tell him about Flint's crew and the captain's death. On the other hand, he didn't want to do that because his mother would be left alone and her safety was most important thing to him. They were also against staying together at the Admiral Benbow because it seemed too dangerous. Therefore, they decided to go next to the nearest village to get help. Then they planned to come back to the inn. They wanted to do that to open the captain's chest and take the money they were owed.

The squire was in Bristol, Dr. Livesey was in London and Jim stayed at the squire's home.

- 2 What two things did the squire have to find during this period, and who helped him to find each?

The squire had to find a ship and a crew and his old friend Blandly helped him to find them.

- 3 Why was Jim sure that Long John Silver could not be the frightening one-legged man who Bill, the guest at The Admiral Benbow, had spoken about?

Jim felt sure Silver couldn't be the one-legged man Bill had talked about because he seemed so friendly and honest.

- 4 What did Smollett feel were, on the one hand, the good and, on the other hand, the very bad things about Mr Arrow?

Smollett felt on the one hand that Mr. Arrow was a good sailor and on the other hand that he was too friendly with the crew to be a good officer.

- 5 What did members of the crew know about the aim of the voyage that Smollett did now know, and how did he feel about this?

~~members of the crew knew that the aim was to find treasure, and he was not happy that they knew something that he had not been told.~~

- 6 Why did Smollett want all the weapons to be kept near the squire and the people who seemed reliable at the stern of the ship?

~~He wasn't happy with the crew, and he wanted to make sure that the ship, the squire and his people would be safe from them.~~

## Episode 4: The voyage

### A Add the missing words to the summary of Episode 4, Section 1: The voyage begins.

Everyone worked hard all (1) night to get the ship ready to leave Bristol early the next morning. When the time came, the sailors called for (2) Long John Silver to sing as they lifted the heavy ship's (3) anchor. The song made Jim remember how the old (4) captain used to sing back at (5) The Admiral Benbow.

The voyage appeared to go quite well at first. The (6) Hispaniola was a good ship, the crew were (7) experienced, and Captain Smollett (8) knew how to do his job well. There was only one man who was a problem - (9) Mr. Arrow, but he disappeared one dark, stormy (10) night, and it seemed that he must have fallen into the sea.

Even though Long John Silver only had one (11) leg, he was able to get around amazingly well. He was also friendly with everyone, including Jim, and he often invited the cabin boy into his (12) galley. In there, he kept his parrot, called (13) Captain Flint, and this bird used to keep repeating the words (14) pieces of eight. Silver explained that the parrot had learned these words when a huge (15) treasure of these coins had been pulled up from the seabed.

### C Exam practice: Write two paragraphs.

Give full ~~name~~ to summarise things we learn from the conversation that Jim hears by accident.

Through the apple barrel episode, what do we discover that Long John Silver really was? By talking to young Dick, what was the older man persuading him to do? Who else did he talk to after this and what do we learn about this man?

When Silver talks to Dick about money, how did he show that he was different from the other men? From this, do we realize that he was much more or much less clever than the others? What did he say about his future plans after they take the treasure?

1

Through the apple barrel incident, we discover that Long John Silver is really a pirate and the one who looked after supplies for Flint. By talking to young Dick, he is persuading him to join the pirate group on the Hispaniola. After this, Silver also talks to the coxswain, Israel Hands, and we learn that this man is also a pirate.

When Silver talks to Dick about money, he shows that he is different from the other men because he saves his money whereas the others quickly spend all theirs.

From this, we realize that he is much more clever than the others. And with his money, he plans to leave somewhere quietly with his wife for the rest of his life.

B Write out the complete summary, expanding ■ necessary and putting the verbs in the correct past tense forms.

After the Hispaniola reached the island the next morning, the crew stopped following orders properly and started grumbling. The men were clearly close to mutiny, and so we had a meeting in the cabin to decide what to do. Smollett decide that silver and most of the crew should go ashore because silver would tell the men to work properly to hide his secret plan. Jim decided to drop quietly into one of the pirates' boats, but silver saw him, so when the boats reached the beach, the boy jumped out and ran into the woods for safety. when Jim later heard voices, he quietly moved closer, and he saw that it was silver and one of the crew called Tom. He saw that silver was trying to persuade Tom to join the pirates, and when Tom refused, silver cruelly killed the poor man. Then silver blew his whistle, and Jim guessed that he was calling his men, and so he ran back through the woods to save his own life.

C Work with ■ partner. Take turns to read out the whole summary, sentence by sentence.

# D Exam practice: Write three paragraphs.

Tell the story of Ben Gunn and Treasure Island in three short paragraphs.

## 1 Expand the sentence parts and put them in the correct order to form topic sentences for each paragraph.

- a • on / second visit / Treasure Island, / B.G. (be) on / different ship / (persuade) / crew / help him look for / treasure
- b • in / three years from then until now, / (live) alone, and / (have) only / to eat / all that time
- c • B.G. first (come) / Treasure Island many years ago when / (be) / member of Captain Flint's crew

## 2 Write out the first topic sentence below, and then add information to complete the first paragraph. Write about:

- other members of the crew
- what happened on the island

## 3 Write out the second topic sentence below, and then add information to complete the second paragraph. Write about:

- what happened on the island during the first twelve days
- what happened after that

## 4 Write out the third topic sentence below, and then add information to complete the third paragraph. Write about:

- what <sup>4.a</sup> B.G. seems to have found during these years, and how we know this
- what <sup>4.b</sup> he is frightened about when he first sees Jim
- what <sup>4.c</sup> he promises to give Jim, and why
- how <sup>4.d</sup> he hopes to leave T.I. for ever

### Ben Gunn and Treasure Island

Ben Gunn first came to Treasure Island many years ago when he was a member of Captain

Flint's crew. At that time, Billy Bones was the ship's mate and Long John Silver looked after the ship's supplies. Flint took six strong sailors to the island to help bury the treasure, but he came back alone. He had killed them all. On his second visit to T.I., Ben Gunn was on a different ship, and he persuaded the crew to help him look for the treasure. During the next twelve days they looked for the treasure, but they found nothing. After that, the other crew members angrily left him on the island with just a gun, a pickaxe and a spade, and they told him to find the treasure himself.

In the three years from then until now, he has lived alone, and he has had only goats, berries and fish to eat for all that time.

During these years, <sup>4.a</sup> he seems to have found Flint's treasure because he says that he is rich. <sup>4.b</sup> When he first sees Jim, he is frightened that Flint's ship has returned.

<sup>4.c</sup> He promises to give Jim some of his treasure because the boy is the first to find him. <sup>4.d</sup> He hopes the squire will want his help and will let him leave T.I. for ever on the Hispaniola.

## Episode 6: The stockade

A Find the mistakes and write out the sentences correctly. (There ~~are~~ always three or more mistakes.)

- 1 The doctor and <sup>Hunter</sup> Redruth took <sup>about</sup> ~~two~~ boats and landed far to the ~~right~~ of the pirates' boat, and not far from a stockade which they had seen ~~from the ship~~.  
The doctor and Hunter took on the treasure map
- 2 After a quick return to the <sup>ship</sup> ~~beach~~, the doctor and the others loaded his <sup>medicine</sup> ~~seaman's~~ chest, some food supplies, some ~~swords~~ <sup>muskets</sup> and some gun powder to take to the stockade.
- 3 On the boat's <sup>third</sup> ~~fourth~~ and final trip to the shore, the squire, the doctor, Captain Smollett and <sup>two</sup> ~~three~~ others took with them various supplies. <sup>Israel Hands</sup> ~~Silver~~ and the other <sup>four</sup> ~~five~~ men they <sup>didn't trust</sup> ~~trusted~~ were left behind on the ship.
- 4 With its heavy <sup>by</sup> ~~load~~, the boat was low in the water, so when a <sup>cannon</sup> ~~musket~~ shot from the Hispaniola fell right ~~on~~ <sup>by</sup> it, it began to sink, and everyone had to <sup>walk</sup> ~~swim~~ to the beach, leaving <sup>half</sup> ~~all~~ their supplies underwater.
- 5 <sup>The mutineers</sup> Grey and Hunter got the rest of the supplies at low tide, so then everyone inside the stockade had enough food for only eight days – and they could not hope for Blandy's rescue ship to arrive for several <sup>ten</sup> ~~weeks~~.  
months
- 6 As Jim returned to his friends with Ben Gunn's request for a meeting with <sup>The squire</sup> ~~Captain Smollett~~, the young cabin-boy saw the <sup>captain Smollett's flag</sup> ~~Jolly Roger~~ flying above the stockade and <sup>the Jolly Roger</sup> ~~Captain Smollett's~~ flag flying from the ship's mast.

7 After Jim's return to the ship, he slept long and deep, and he was finally woken up next <sup>morning</sup> ~~afternoon~~ by the sound of ~~birds in the trees and~~ <sup>voices</sup> the pirates' request for a peace meeting with Silver, who now called himself 'Admiral'.

*captain*

8 Silver threw his ~~hat~~ <sup>crutch</sup> over the stockade fence, ~~came through the gate in~~ <sup>climbed over</sup> the fence, and then he offered to exchange the lives of everyone ~~outside~~ <sup>inside</sup> for some food, but the squire offered instead a fair trial for all the pirates back in England. ~~the map~~

9 Angrily, Silver said that the lucky ones would be the ones who died in the coming fight. ~~While he was leaving,~~ <sup>After he had left</sup> everyone prepared ~~swords~~ <sup>muskets</sup> for the pirate attack which followed ~~two hours later~~ <sup>an hour</sup> and which left many dead and badly hurt.

### ■ Exam practice: Write ■ short <sup>مقاله</sup> essay.

1 Take the part of Dr Livesey and write notes about the friends' situation at the end of the fight. List points in their favour and points in the pirates' favour.

- more/fewer people, control of the stockade/the rest of the island/the ship:

*Jim* → *US: fewer people; control of the stockade*  
*Silver* → *Them: more ~~of~~ of the rest of the island and the ship.*

- weapons on both sides:

*US: muskets, swords*  
*Them: ship's cannon.*

- supplies on both sides – including food for the friends to survive for how long; how long before a rescue ship can arrive:

*US: only the supplies in the stockade, including food for just ten days.*

*Them: all the ships supplies months before a rescue ship can arrive.*

2 Use these sentence parts to write the doctor's introductory paragraph **the next page**.

following / terrible fight / stockade, / (seem) / good time to consider / situation in detail. Here (be) some / points in our favour / points against us

3 Use your notes from 1 to write three more short paragraphs about the situation on the next page.

4 Write your conclusion starting as shown below, and then finish with your own answers to these questions.

- Are the dangers greater than / less great than the points in your favour?
- Do you believe that your friends and you will survive and return home safely, or do you think that your friends and you will be killed and will never leave Treasure Island alive?

### Our situation at the end of the fight

Following our terrible fight at the stockade, this seems a good time to consider our

situation in detail. Here are some of the points in our favour, as well as some of the points against us. We have fewer people, but at least we have control of the stockade. However, the pirates have more people, and they have control of the rest of the island as well as the ship.

On our side, we have muskets and swords.

On theirs, they have muskets too, and they also have the ship's cannon.

We have only the supplies here in the stockade, including food for just ten days.

However, they have all the ship's supplies.

In addition to this, it will be months before a rescue ship can arrive.

After considering our situation from different points of view, I feel that the dangers are greater than the points in our favour. I believe that my friends and I will be killed and will never leave T.I. alive.

**B Add the missing words to the summary of Episode 7, Sections 3 and 4.**

After Jim had climbed on board the (1) ship (Hispaniola), he found two men who both seemed (2) dead. Jim was thinking that they must have killed each other, but then one of them – (3) Israel Hands – moved and asked for some brandy.

Jim found some brandy for the pirate, gave it to him, and then told the man that he, Jim Hawkins, was now in charge.

Both Jim and Hands now wanted to beach the (4) Hispaniola somewhere safe, but Jim did not know how to sail the ship and Hands was not strong enough to do the job. Instead, he offered to tell the boy what to do, and soon Jim was (5) bringing/sailing the ship into the safety of the (6) North Inlet.

Just before the Hispaniola beached, Jim turned to find Hands standing with a (7) knife in his hand, ready to kill him. He came towards Jim, but Jim quickly moved to avoid the attack. And then the ship hit the shore violently and fell to one (8) side, throwing both man and boy to the (9) deck. Jim quickly got up <sup>and</sup> ran to the nearest (10) mast and started climbing up. When he was high up, he stopped to load his (11) pistols. But Hands was following fast. Then he too stopped as he (12) threw the knife and hit Jim in the (13) shoulder. Despite this, Jim was able to fire both guns, and Hands fell into the (14) water with a cry.

Finding that he was not badly hurt, Jim threw the other dead man into the water, too. Then, leaving the ship as safe as he could, he started walking back as fast as possible to the (15) stockade to tell his friends everything that had happened.

He finally got there late at (16) night, and he was happy to hear loud snoring as his friends slept inside. But then, going in through the (17) gate, he was surprised to hear a strange voice calling out, 'Pieces of eight! Pieces of eight!' It was the (18) parrot, Captain Flint!

There was no time to do anything: in a moment, the pirates were awake, and they quickly caught Jim. There was no escape!

C Exam practice: Write a short, imaginative essay.

Imagine yourself, ■ Jim, asleep ■ the boat. Describe your dreams about home and events at The Admiral Benbow. Describe three of the events – strange, frightening or sad – that you remember most clearly.

Write ■ short paragraph about each.

My dreams about home and events at The Admiral Benbow

After I had fallen asleep, I soon started dreaming about home and things that had happened at the Admiral Benbow. First, I dreamed about the day that Black Dog arrived. In my dream, I heard the captain and the visitor start shouting and then I saw the frightening sword fight again. Later I dreamed about the sad time when my father became ill and then died. In my dream, my mother and I were holding each other and crying together.

After that, I had a terrible dream about the night when my mother and I opened the dead captain's chest to take the money that we were owed. I dreamed that Pew and his men were coming to catch us and kill us and that we could not get away. I was really frightened!

Then I woke up and I was very happy to find that I was still alive – although I was certainly still in a dangerous situation in my little boat out on the open sea.

## Episode ■ Captain Silver

*He came to the stockade the next morning in order to look after the injuries of two of the sailor.*

- 6 What was Silver most worried about, and how did he ask the doctor to help him?

*Most of all, Silver was worried that he would be hanged, and he asked the doctor to say a good word about him.*

**C Write out the complete summary, expanding as necessary and putting the verbs in the correct past tense forms.**

~~When the pirates went up the hill to find the treasure, Long John Silver tied Jim with some rope and made him follow. Then pirates were frightened first to find a skeleton and then to hear what they thought was the sound of ghost singing. They became very excited as they got near the treasure site, but when they reached it, all they found was a large, empty hole. Shock changed to anger and they turned to kill Silver and Jim, but then musket shots hit two of them and the other three quickly ran away. During their return to the boats, the doctor explained every thing and Jim learned that Ben Gunn had found and moved the treasure to a secret cave long before. After they had destroyed one boat and rowed the other along the coast to the cave, they joined the squire and Captain Smollett – and there of course was the treasure, too.~~

~~The squire didn't want to accept Silver, but by the evening that terrible pirate had turned himself back into the same friendly seaman he had seemed to be in Bristol long before. It took days to load all the treasure on the Hispaniola, but then they were ready; they left some supplies for the three pirates, and they sailed away from treasure island forever when they reached Mexico, Long John Silver disappeared with a bag of coins and the others sailed away to England with all the rest of the treasure.~~

#### D Interpret the text.

- 1 How did Jim react in Section 1 when Long John Silver told him he had the treasure map, and what did Jim probably think then?

~~when silver told him that he had the map, Jim's mouth fell open, and he probably thought that the pirates had won the fight for the treasure.~~

- 2 What do we learn in Section 5 that shows why the doctor was happy to give the map to Silver?

~~we learn that the doctor was happy to give the map to silver because Ben Gunn had already moved all the treasure away to a cave on <sup>the</sup> other side of the island.~~

- 3 What did the doctor mean in Section 3 when he told Silver to expect trouble?

~~when the doctor told silver to expect trouble, he meant that the pirates would find just an empty hole instead of the treasure, and that the other men would be very angry with their leader, silver.~~

#### E Exam practice: Write a short, imaginative narrative.

In Episode 6, Dr Livesey tells part of the story. Now do the same for the time after he leaves the stockade at the start of Episode 7. Imagine and tell the doctor's story of his journey to find and talk to Ben Gunn. When you narrate their conversation, use a mixture of direct and reported speech.

##### What happened after I left the stockade

~~After eating lunch, I picked up two pistols, a musket, a sword and the treasure map and walked quickly into the woods to the north. After nearly an hour, I saw something between the trees. It was dark and strange and bent over: it was Ben Gunn. 'Ben Gunn?' I called. 'I am Jim's friend, Dr Livesey, please come out and let's talk.' Slowly, Ben Gunn nervously appeared. 'Are you really not one of Flint's men?' he asked. 'No, certainly not,' I replied. 'we're fighting for our lives against them.' 'well,' he asked, 'if I help you, will you help me to get away from this terrible island forever?' I promised that we would very happily help him and said that we needed all the help that we could get. I explained that the pirates wanted to take the map, find the treasure and kill all of us. 'well, even if they get the map, that won't help them,' the castaway said with a sudden laugh. 'why? that?' I asked, and Ben Gunn told me his story. He had found the treasure, he explained, and little by little he had carried it to a secret cave on the other side of the island. At first, I could not believe the man, but he told me that it was all completely true, and he asked me to go with him and see. Together, we climbed Spy glass Hill, and Ben showed me a large hole at the top. 'That's where the treasure was,' he said, and then he invited me to go on with him again - this time to the cave. It was a long way, and it was early evening before we got there. However, my journey had a happy end. There, deep in the dark cave, the treasure shone gold in the last light of the sun. It was a wonderful sight! I began to think that we could perhaps win against silver and the pirates.~~
